

## KMTC MAUA Campus to Start Operations May, 2021.

The Kenya Medical Training College Board has given a green light for the KMTC Maua Campus to admit students.

The KMTC Maua campus whose construction was fully funded by Igembe South NG-CDF is currently recruiting students who wish to pursue a certificate in community health and a foundation course in community health.

This newly built campus is among the flagship projects funded by Igembe South NG-CDF since 2017.

In the financial year 2019-2020, the project was allocated Ksh. 25 million which has been used to construction a lecture complex with six rooms, an administration block, library, computer laboratory and an ablution block.

At the moment, over 30 students have applied to study in the said institution and according to Gladys the acting principal, they will report the coming month.

The new institution has been hailed by most of Maua residents as a game changer.

According to many, it will not only boost education in the region but will promote social and economic transformation of Maua town and the constituency at large.
